## AWS Educate Getting Started with Networking

Issued by [Amazon Web Services Training and Certification](#)

Earners of this badge have completed the Getting Started with Networking training and achieved the required scores on the post-course assessment. They have demonstrated the ability to describe different ways to manage a network and how to use an Amazon VPC to do so.

## Occupations

- ICT Trainers**  
Conduct training-needs analysis and design programs to train students in the use of software packages and information systems. Produce and update existing training materials; deliver effective training in classroom, online, or informally; and monitor, evaluate, and report effectiveness of training.

[Learn More](#)
- IT Infrastructure Services Analysts**  
Develop, test, operate, monitor, manage, and/or support IT services using a collection of hardware, software, networks, data centers, facilities, and related equipment.

[Learn More](#)
- Computer Network Architects**  
Design and implement computer and information networks, such as local area networks (LAN), wide area networks (WAN), intranets, extranets, and other data communications networks. Perform network modeling, analysis, and planning, including analysis of capacity needs for network infrastructures. May also design network and computer security measures. May research and recommend network and data communications hardware and software.

[Learn More](#)
- Data Engineers**  
Develop, construct, test and maintain architectures, such as databases and large-scale processing systems.

[Learn More](#)
- Systems Software Developers**  
Research, design, develop, and test operating systems-level software, compilers, and network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general computing applications. Set operational specifications and formulate and analyze software requirements. May design embedded systems software. Apply principles and techniques of computer science, engineering, and mathematical analysis.
