Occupations

Cloud Implementation Engineers Assist in the migration of data and services from physical IT infrastructure to virtual environments. Conduct tests and troubleshooting activities to ensure smooth transition and continued customer satisfaction thereafter.	Learn More
ICT Consultants Advise on how to optimize the use of existing tools and systems, make recommendations for the development and implementation of a business project or technological solution, and contribute to project definitions. Raise awareness of IT innovations and their potential value to a business, and participate in the assessment and choice of solutions.	Learn More
ICT Trainers Conduct training-needs analysis and design programs to train students in the use of software packages and information systems. Produce and update existing training materials; deliver effective training in classroom, online, or informally; and monitor, evaluate, and report effectiveness of training.	Learn More
IT Infrastructure Services Analysts Develop, test, operate, monitor, manage, and/or support IT services using a collection of hardware, software, networks, data centers, facilities, and related equipment.	Learn More
Technology Implementation Consultants Manage end-to-end technology project implementation for clients. Understand the client requirements, generate solutions, configure software, and conduct end-user training. Ensure smooth product adoption.	Learn More
