Occupations

Cloud Implementation Engineers
Assist in the migration of data and services from physical IT infrastructure to virtual environments. Conduct tests and troubleshooting activities to ensure smooth transition and continued customer satisfaction thereafter.

Learn More

ICT Consultants
Advise on how to optimize the use of existing tools and systems, make recommendations for the development and implementation of a business project or technological solution, and contribute to project definitions. Raise awareness of IT innovations and their potential value to a business, and participate in the assessment and choice of solutions.

Learn More

IT Infrastructure Services Analysts
Develop, test, operate, monitor, manage, and/or support IT services using a collection of hardware, software, networks, data centers, facilities, and related equipment.

Learn More

Technology Implementation Consultants
Manage end-to-end technology project implementation for clients. Understand the client requirements, generate solutions, configure software, and conduct end-user training. Ensure smooth product adoption.

Learn More

Enterprise Architecture Consultants
Serve as advisor to senior business management on technology, software, and information integration strategies. Assist to define, implement, and execute the processes for the definition, maintenance, and management of the enterprise architecture.
